

SIRAJUDHEEN T K

SENIOR ANDROID DEVELOPER

Malappuram, Kerala, India | +91 89079 59938 | sirajudheentk@gmail.com | [LinkedIn: Sirajudheen Tk](#)

PROFESSIONAL SUMMARY

Senior Android Developer with 6+ years of experience building scalable, high-performance Android applications using Kotlin, Java, MVVM/Clean Architecture, and Jetpack components. Strong background in end-to-end mobile development including requirement analysis, API integration, performance optimization, and Play Store releases. Proven expertise in crash/ANR resolution, BLE/IoT integrations, payment systems, and mentoring junior developers. Experienced across product-based, FinTech, startup, freelance, and service-based environments with a strong focus on clean code and maintainable architecture.

TECHNICAL SKILLS

Kotlin | Java | MVVM / Clean Architecture / MVP / MVC | Android SDK | Jetpack Compose | Material Design | REST APIs (JSON/XML) | Retrofit | Volley | SQLite | Room | Firebase | MySQL | AWS | Bluetooth / BLE / IoT | Stripe / Razorpay | Android Studio | IntelliJ | Eclipse | Git | Bitbucket | Azure | Performance Optimization | Crash & ANR Fixing | JUnit / JUnit5 | Jira | Figma | Play Store Deployment | App Development from Scratch | TensorFlow / OpenCV (Basic) | HTML / CSS (Basic) | Flutter (Learning)

PROFESSIONAL EXPERIENCE

Senior Android Developer

Wipro Limited April 2026 - Present

- **Streamlined workflows with HPKToola & HPK2Tool**, integrating into CI/CD pipelines for faster delivery.
- **Automated repetitive tasks** using HPKToola, reducing manual effort and improving deployment accuracy.
- **Leveraged Copilot AI** to accelerate code reviews, documentation, and troubleshooting for HP client projects.
- **Collaborated with HP teams** to enhance HPK2Tool integration, ensuring secure, scalable, and maintainable solutions.

Senior Android Developer

Side-International Studios India Pvt Ltd | Oct 2025 – Dec 2025

- Designed and developed scalable Android applications using Kotlin, MVVM/Clean Architecture, and Jetpack.
- Owned full feature lifecycle including requirement analysis, development, optimization, testing, and production release.
- Improved application stability by fixing crashes, ANRs, memory leaks, and optimizing background/network operations.
- Integrated REST APIs using Retrofit with authentication and error handling in collaboration with backend teams.
- Implemented Bluetooth/BLE/IoT features for connected application workflows.
- Mentored junior developers, performed code reviews, and enforced coding standards.

Senior Android Application Developer

Pearldata Direct Pvt Ltd (FinTech – Lulu Forex Group) — Kochi, Kerala | July 2021 – Oct 2025

- Built and maintained production Android applications in a product-based FinTech environment.
- Delivered BBPS bill payments, ENET services, and Lulumoney card integrations.
- Implemented secure API communication using Retrofit, Volley, Firebase, and Room DB.
- Enhanced UI/UX using Material Design and Figma handoffs.
- Managed Play Store releases and version control.
- Improved performance and scalability through continuous debugging and optimization.

Android Application Developer

Thorsignia Pvt Ltd — Bangalore, Karnataka | Sep 2020 – Jun 2021

- Developed and maintained e-commerce Android applications using Kotlin and Java in a service-based project environment, following MVP architecture for clean and maintainable code.
- Integrated RESTful APIs for product listings, user authentication, order management, and payment-related workflows.
- Implemented camera-based features for image capture/processing and built responsive UI adhering to Material Design guidelines.
- Collaborated with cross-functional teams to deliver client-specific enhancements, bug fixes, and feature improvements.
- Performed code maintenance, refactoring, and performance optimization to improve application stability and usability.

Android Application Developer

Wishto Internet Pvt Ltd — Hyderabad, Telangana | Jul 2019 – Apr 2020

- Developed Android apps from scratch in a startup environment using MVC/MVP.
- Supported complete development lifecycle including deployment.

Freelance Android Developer Remote | Jan 2017 – Jun 2019

- Delivered multiple Android apps published on Google Play Store.
- Managed UI development, backend integration, and deployment independently.

Android Developer Trainee

Spectrum Softtech Solutions — Kochi, Kerala | May 2016 – Oct 2016

- Learned Android SDK fundamentals, UI development, and application architecture.

KEY PROJECTS / PUBLISHED ANDROID APPS (B2C)

LuLu Money – Money Transfer (FinTech)

- Contributed to development and maintenance of a large-scale money transfer application.
- Implemented secure API integrations, payment workflows, and performance optimizations.
- Worked on stability improvements including crash/ANR fixes and production releases.

Trust Money

- Developed core Android features using Kotlin with MVVM architecture.
- Integrated REST APIs and Firebase services for secure transactions and real-time updates.
- Enhanced UI/UX using Material Design and supported Play Store deployment.

Hi Wash Worker

- Built service-based Android modules for worker onboarding and job management.
- Implemented backend integration, authentication flows, and data persistence.
- Improved app responsiveness and overall user experience.

EDUCATION

Android Application Developing — Spectrum Softtech Solutions, Kochi (2016) **Bachelor of Commerce** — Calicut University / Learners College (2010–2013) **Higher Secondary (Commerce)** — Kerala State Syllabus (2007–2009)

SSLC — Kerala State Syllabus (2007)
